

Solarx™ 550UVB-NB-CR

"Clinic Rated" Narrowband UVB Hand, Foot & Spot Phototherapy
With Optional Positioning Cart

The **Solarx 550UVB-NB-CR** is for use in busy phototherapy clinics. A single device can be used by itself, just like a standard 500 Series (see other brochure) or two devices can be mounted in the optional Positioning Cart as shown, for simultaneous hand & foot treatments.

These "Clinic Rated" units have a cooling fan and are electrically labeled Risk Class 2G (hospital grade low leakage). Five powerful twin-tube compact fluorescent bulbs reduce treatment times and relamping costs.

See other side and SolarxSystems.com for much more information.

Sol Rx 550UVB-NB-CR With Positioning Cart

Two 550UVB-NB-CR devices in a typical hand & foot arrangement. Lockable castors provide mobility.

The devices can be rotated or moved laterally without the use of tools (tools needed for vertical).

Remove the hood and rotate the lower unit downwards to treat the tops of the feet.

A setup to treat the top and palms of the hands simultaneously.

Or stack the devices to create a small panel.

The possibilities are endless...

The "Clinic Rated" SolRx 550UVB-NB-CR provides maximum versatility for busy clinics. Modern Philips 36-watt PL-L36W/01 compact fluorescent bulbs provide considerably greater UVB-Narrowband Irradiance and shorter treatment times than competitive devices using conventional 20-watt "T12" bulbs. With two devices mounted in the optional Positioning Cart, the treatment possibilities are endless. Also available as UVB-Broadband, UVA or UVA1. Please visit SolarcSystems.com/550cr_clinicRated.html for more information. Clinic Warranty: 2 years on device, 6 months on bulbs; plus our Arrival Guarantee

Positioning Cart Dimensions:

29.5" wide (33.0" over rosette knobs)
24.5" deep
50.25" high including casters
Shipped partially assembled.

All SolRx models are US-FDA and Health Canada compliant.

US Federal law restricts this device for sale by or on order of a Physician.

Solarc Systems is ISO-13485 certified for the design & manufacturing of medical ultraviolet phototherapy equipment.
